Purpose of the Manual 2

Function of the Ontario Student Transcript 2

The OST Form 3

Procedures for Completion of OST 3

Regulations Governing OST 10

## Purpose of the Manual

The *Manual for the Ontario Student Transcript* provides the technical information required for the initiation, maintenance, issue, and storage of the Ontario Student Transcript.

This manual supersedes the manuals previously issued. For reference, see Records/Data Memorandum No. 11, "Ontario Student Transcript and Common Course Coding", September 16, 1983, and June 7, 1984.

## Function of the Ontario Student Transcript

The Ontario Student Transcript (OST) was developed to provide a common and consistent summary of a student's successful achievement in Ontario secondary school credit courses.

The Ontario Student Transcript is a component of the Ontario Student Record (OSR). It is the official record of a student's successful completion of Ontario secondary school credit courses as of August 31, 1984.

The legislation governing the Ontario Student Record applies to and includes the OST. This legislation is embodied in the Education Act, section 237, and in Ontario Regulation 271, "Pupil Records".

A current, accurate, and complete OST will be part of the OSR maintained for each student enrolled in an Ontario secondary school credit course on or after September 1, 1984. Sections A and C of the former OSR folder may still be used as the official record of student achievement in secondary school courses for all students who had withdrawn, transferred, or graduated from an Ontario secondary school before September 1, 1984.

However, regardless of their last date of attendance at an Ontario secondary school, all students who need a record of their secondary school achievement in order to enrol in an Ontario secondary school program or credit course will be issued an official OST on which all the courses are listed by their common course codes and common course titles or abbreviations.

# The OST Form

## Versions of the form

The official OST form is available in two versions:
- a form which is preprinted with the required fields and headings onto which the required information may be typed or printed from a computer file;
- a blank form onto which a working copy of the transcript may be photocopied.

The official supplier of these forms is the Guidance Centre, Faculty of Education, University of Toronto, 10 Alcorn Avenue, Toronto, Ontario M4V 2Z8. Telephone: (416) 978-3206.

# Procedures for Completion of OST

## A. General steps

- All dates are to be entered numerically in the following order: year, month, day.
- Only "X's" should be used as indicators in the columns that show level of difficulty, compulsory course, and OAC.
- Every transcript has a number printed on it, designed for use as a control measure by the secondary school or school board.

## B. Steps for completing the general information portion of OST

(See also chart 1 and the sample completed OST on pages 6, 8, and 9.)

| *Field* | *Value/Comment* |
|---|---|
| Date of Issue | Date on which the transcript was issued to the student or sent to another school. |
| Page | Page number of the transcript, if there are several pages. |
| Surname/Given Names | The student's surname should be entered first, followed by the first given name, second given name, and initial if any. |
| Student Number | If the student has a number assigned by the school, it should appear here. |
| Sex | M or F |

| | |
|---|---|
| Birth Date | Student's date of birth. |
| School Board | Name of the school board to which the school that the student is currently attending belongs. |
| School | Name of the school that the student is currently attending. |
| Date of Entry | Date on which the student began studies in the school that he/she is currently attending. |

## C. Steps for completing the academic information portion of OST

(See also chart 2 and the sample completed OST on pages 7 to 9.)

| *Field* | *Value/Comment* |
|---|---|
| Date | Date on which the student successfully completed the course. |
| Grade | The grade of the course will be entered here, not the grade in which the student is enrolled. The fourth character in the common course code shows the grade of the course, as follows:<br>Grade 9 = 1 Grade 12 = 4<br>Grade 10 = 2 Grade 13 = 5<br>Grade 11 = 3 OAC = 0 |
| Course | The common course title or abbreviation, as stated in the *Manual for the Common Course Code*, is to be used. |
| Course Code | The common course code (CCC), as stated in the *Manual for the Common Course Code*, is to be used. |
| Achievement | The mark the student received for the course, expressed as a percentage (see section 4.14 of the Ministry of Education's *Ontario Schools, Intermediate and Senior Divisions (Grades 7-12/OACs): Program and Diploma Requirements, 1984*). |
| Credit | The credit value of the course (1 credit, 1/2 credit, 1/4 credit). A whole number and two decimal places should be used: 1.00; 0.50; 0.25. |
| Compulsory | Compulsory courses are to be indicated with an "X". Secondary school courses being substituted for compulsory courses, with the consent of the secondary school principal, should also be indicated with an "X". |
| Level of Difficulty | An "X" should appear in the appropriate column when the level of difficulty is known. The fifth character of the common course code shows the level of difficulty of guideline courses, as follows:<br>B = basic A = advanced<br>G = general<br>For non-guideline courses, the level is shown as follows:<br>X = advanced Z = basic<br>Y = general |
| OAC | OACs are to be indicated with an "X". |
| Summary of Credits | The appropriate column totals should be entered here. |

## D. Steps for completing the diploma information portion of OST

(See also chart 3 and the sample completed OST on pages 7 to 9.)

| *Field* | *Value/Comment* |
|---|---|
| Diploma or Certificate | The name(s) of any completed diploma(s) and/or certificate(s) should be entered in their order of completion. |
| Issue Date | Date on which the diploma and/or certificate was completed. |
| Hours of French Language Instruction | Only the number of hours completed in an Ontario secondary school program in French as a second language are to be entered. |
| Area of Concentration | The area of concentration in Business or Technological Studies should be shown. |
| Authorization | Signature of the secondary school principal or a person designated by him/her. |

## E. Steps for completing the equivalent credit information on OST

| *Field* | *Value/Comment* |
|---|---|
| Date | Date on which the equivalent credit status was granted by the Ontario secondary school or school board. |
| Grade | This field should be left blank. |
| Course | The type of equivalent standing that is being granted:<br>– maturity credit<br>– out-of-province secondary school credit<br>– apprenticeship credit<br>– equivalent education credit |
| Course Code | This field should be left blank since common course codes are not assigned for equivalent credits. |
| Credit | The total number of credits granted should be entered as a block of credits in the credit column. The Ontario Ministry of Education's *Secondary School Diploma Requirements: Circular H.S.1, 1979-81* and *Ontario Schools, Intermediate and Senior Divisions (Grades 7-12/OACs): Program and Diploma Requirements, 1984* will serve as guides. |
| Achievement | The code "EQV" should be entered here; marks are not entered in this field. |
| Compulsory | A total number of compulsory credits granted within the block of equivalent credits should be entered. This is the only time that a number rather than an "X" will appear in the compulsory course column. |
| Level of Difficulty | This field should be left blank. |

## Chart 1. General information portion of OST

# Regulations Governing OST

## Initiation

– An OST will be initiated for any student enrolled in an Ontario secondary school course for the purpose of achieving an Ontario secondary school credit, on or after September 1, 1984. Records of student achievement in courses completed prior to this date will have to be converted to the OST format with the use of appropriate common course codes and common course titles or abbreviations.

## Maintenance

– A current and accurate OST will be maintained in the Ontario Student Record of any student enrolled in an Ontario secondary school course for the purpose of achieving an Ontario secondary school credit, on or after September 1, 1984.
– The OST will be maintained in accordance with the procedures for completion outlined on pages 3 to 7 of this manual.
– Only secondary school courses that have been successfully completed by a student will be included on the OST.
– Courses taken to upgrade achievement will be shown only once on the OST, with the highest grade recorded.
– All secondary school courses listed on an OST will be identified by the appropriate common course code and common course title or abbreviation, in accordance with the Ministry of Education's *Manual for the Common Course Code*.
– Successfully completed courses in the co-operative education mode of delivery will be recorded on the OST in accordance with the *Manual for the Common Course Code* (page 4).
– Equivalent standing granted for maturity, apprenticeship studies, out-of-province study, or equivalent education will be recorded on the OST in accordance with the procedure outlined in this manual (see page 5).
– An accurate and current working copy of OST may be maintained in the OSR folder for internal school use. The working copy may be printed or recorded on a computer. This working copy is, however, acceptable for internal use only and must be copied onto an official OST form before it is issued to the student or when it is required for any external use or when the OSR is transferred.

## Issue

– In accordance with the regulations set out in the *Manual for the Ontario Student Record (OSR) System* and Ontario Regulation 271, "Pupil Records", an official Ontario Student Transcript will be issued for any student enrolled in a secondary school credit course or program on or after September 1, 1984.
– An official OST will be issued to any student who requires a transcript in order to enrol in an Ontario secondary school credit course, regardless of his/her last date of attendance at school.

## Storage

– The OST is an official component of the OSR and is governed by the storage regulations set out in Ontario Regulation 271, "Pupil Records", and in the *Manual for the Ontario Student Record (OSR) System* (1985).

- French-English Code Relationship Table 57

CCC

## Purpose of the Manual

The *Manual for the Common Course Code* (CCC) sets out the common coding format required for Ontario secondary school courses developed from Ministry of Education curriculum guidelines or approved as non-guideline courses and undertaken by students for the purpose of achieving an Ontario secondary school credit. Each secondary school course will be assigned a common course code (CCC), common course title, and abbreviation related to the curriculum guideline from which the course of study was developed. Codes assigned to non-guideline courses will be derived from the most closely related guideline.

This manual supersedes the manuals previously issued. For reference, see Records/Data Memorandum No. 11, "Ontario Student Transcript and Common Course Coding", September 16, 1983, and June 7, 1984.

Two sets of CCC tables are provided in this manual. The blue tables are for courses of study developed from English-language curriculum guidelines. The green tables are for courses developed from French-language guidelines. A French-English code relationship table is also included.

## Function of the Common Course Code

The CCC supports the common framework of program aims, learning objectives, and educational experiences outlined in the Ministry of Education's curriculum guidelines. The code will be used to identify courses in school calendars, timetables, report cards, reports to the ministries, information for postsecondary institutions, and Ontario Student Transcripts. The establishment of a common and consistent identification code for Ontario secondary school credit courses will:

- facilitate student transfers from one secondary school to another without unnecessary disruption of the student's educational progress;
- assist postsecondary institutions in their assessment of applicants' secondary school programs;
- make students' secondary school program records more comprehensible to employers;
- reinforce the common base of Ontario secondary school courses established through curriculum guidelines.

New curriculum guidelines will initiate changes in courses of study which will be reflected through the addition of CCCs and titles. New guidelines will be released with CCC table insert pages, which are to be added to the CCC tables in this manual, thereby creating a complete and up-to-date record of all common course codes and titles.

School calendars will contain an explanation of the CCC system. This shall include an explanation of the structure of the code, the generic nature of the titles, and the code's relationship to the curriculum guidelines and the common base of secondary school courses throughout the province.

# Common Course Code Format

The common course code consists of the following components, designated by the Ministry of Education:

– five code characters
– a course title
– a course title abbreviation

**The CCC Characters**
All five characters in the CCC are mandatory. Each character has a meaning (see the accompanying chart). A secondary school or school board may add characters to the CCC, but their meaning will be fixed by the school or board that introduced them and will be for internal use only. The five CCC characters must precede any characters added to the code.

A non-guideline course approved by a regional office of the Ministry of Education will be assigned a code by the Statistical Information Services Section of the Research and Information Branch. The first three characters of non-guideline course codes will be derived from the most representative curriculum guideline or subject group. The non-guideline nature of the course will be indicated by the fifth code character (see the accompanying chart).

The first three characters of the CCC are given in the CCC tables of this manual. Secondary schools will add the fourth and fifth code characters for all courses in their curriculum, to indicate the grade and the level of difficulty.

The grade of a course is the grade that the course is assigned in the school timetable. It may not be the same as the student's grade. For example, a Grade 10 student may be enrolled in a Grade 9 or Grade 11 course.

Courses designated in a curriculum guideline simply as Intermediate will be coded as Grade 9 or 10 ("1" or "2" as the fourth character); Senior will be coded as Grade 11 or 12 ("3" or "4").

## CCC Characters Chart

**The first character**

The first character is an alpha that indicates the subject or subject group. It relates to the curriculum guideline.

**The second character**

The second character is an alpha that indicates the course group or subject/ course group. The curriculum guideline determines this grouping.

**The third character**

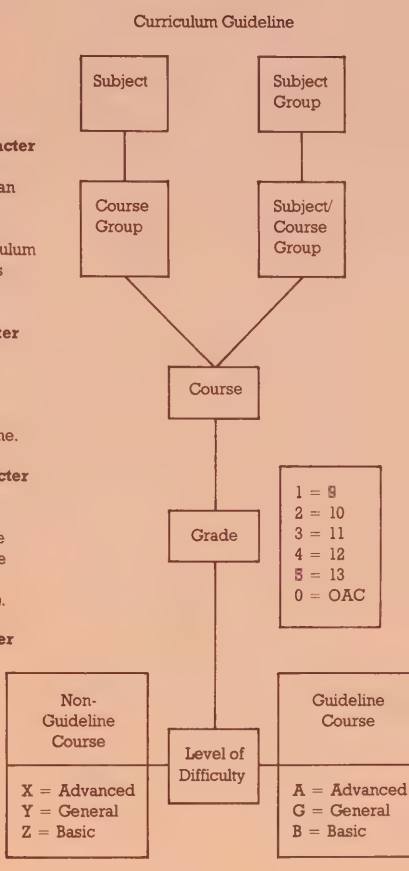
The third character is an alpha that indicates the specific course. It relates to the curriculum guideline.

**The fourth character**

The fourth character is a numeric that indicates the grade at which the course is offered. An OAC is represented by "0" (zero).

**The fifth character**

The fifth character is an alpha that indicates the level of difficulty of the course.



The Common Course Code Tables (pp. 9-56) give the first three characters of the codes.

CCC

**The Common Course Title and Abbreviation**

The common course title is a generic reference to the subject of the course, the subject group, or the curriculum guideline from which the course of study is developed. For internal purposes, schools may choose to assign a subtitle in addition to the common course title. The subtitle shall not precede or replace the common course title. The subtitle shall not be used on Ontario Student Transcripts or in external reports, but it may be included in course descriptions in course calendars or on report cards.

Each course developed from a curriculum guideline will be assigned a common course title and abbreviation. A non-guideline course approved by a regional office of the Ministry of Education will be assigned a title and abbreviation by the Statistical Information Services Section of the Ministry of Education's Research and Information Branch.

All common course titles will have a maximum of thirty-five characters. All abbreviations will have a maximum of twelve characters.

The language of the common course title will identify the course's language of instruction.

The common course titles of courses taken in a co-operative education program will refer to the in-school components of the course. For the out-of-school components, "(Co-op. Ed.)" will be added to the course titles: e.g., BAC 4G Accounting and BAC 4G Accounting (Co-op. Ed.)

**Special Applications**

Codes and titles of courses developed from out-of-date curriculum guidelines will be required for reference purposes.

The following codes will be used for external music courses:

AMX 0A (for an OAC credit)
AMX 5A (for a Grade 13 credit)
AMX 4A (for a Grade 12 credit)

For driver education, the code will be TAD, plus the grade, and "B" for the level of difficulty.

Recognition of equivalent standing can be granted for students working towards an Ontario Secondary School Diploma, by giving equivalent-credit allowances in the following categories: maturity, apprenticeship, equivalent education, and out-of-province study.* For the recording of equivalent standing, see the *Manual for the Ontario Student Transcript.*

*See Ontario, Ministry of Education, *Ontario Schools, Intermediate and Senior Divisions (Grades 7-12/OACs): Program and Diploma Requirements* (Toronto, Ministry of Education, Ontario, 1984), section 6.14 and Appendix D.

# Conversion of Student Achievement Records

**Regulations Governing Conversion**

The record of achievement of any student registered in an Ontario secondary school course or program on or after September 1, 1984, will be converted to the common course code.

*Exceptions*

- The record of achievement of any student who withdrew, transferred, or graduated from an Ontario secondary school between September 1, 1984, and September 1, 1985, will be converted to common course codes and titles or abbreviations only if he or she requests an Ontario Student Transcript.
- Regardless of when he or she left the system, any student who requires an Ontario Student Transcript in order to return to school for the purpose of achieving a recognized Ontario secondary school credit will be given an Ontario Student Transcript converted to common course codes and titles or abbreviations by his or her last school of attendance. (See the *Manual for the Ontario Student Transcript.*)

**Application of Codes and Titles**

The CCC and common course title or title abbreviation that most accurately reflect the secondary school course will be used to identify the course for conversion purposes.

Courses that were offered by secondary schools at the modified level of difficulty before the changes brought in by OSIS will use "B" as the fifth code character.

Secondary school courses completed prior to the introduction of levels of difficulty or designated as open or non-level courses will use "N" as the fifth code character.

**Non-Guideline Courses**

Courses that were non-guideline courses at the time of completion but have since been converted to guideline courses should be given CCCs and common course titles or abbreviations from the current guideline.

Courses that were non-guideline courses at the time of completion but are no longer offered in the secondary school curriculum and cannot be coded according to any curriculum guideline should be represented by the common course title that most closely reflects the subject or subject grouping of the course.

## Common Course Code Table Format

| Common Course Code | | | Application | Curriculum Guideline | |
|---|---|---|---|---|---|
| Course Code | Course Title | Title Abbreviation | | Title | Date of Issue |
| First three characters of CCC (assigned by ministry); fourth and fifth characters (assigned by secondary school) | Common course title (maximum of 35 characters) | Common course title abbreviation (maximum of 12 characters) | Cross references, special or restricted applications | Curriculum guideline title | Date curriculum guideline released |
